Child & Youth with Support Needs (CYSN)

CYSN serves families who are parenting children with support needs. The format is family support, individually and in groups. As well as home outreach. Referrals from MCFD / CYSN.

Fetal Alcohol Spectrum Disorder (FASD)
(Birth to 18)

Providing information, advocacy and support to families with children and youth, from birth to 18 years in whom Fetal Alcohol Spectrum Disorder (FASD) and other Complex Developmental Behaviour Disorders are suspected, or where there is a confirmed diagnosis. Assistance can be provided throughout the FASD assessment process, as well as ongoing parent-to-parent support.

Infant Development (IDC)
(Birth to 3)

Offering home-based outreach services for children from birth to 3 years. The Infant Development Consultants serve children who may be at risk for developmental delays. Group activities for parents and children are also provided.

Occupational Therapy (OT)
(Birth to 5)

Providing service to children from birth to 5 years through assessment, treatment, and consultation. The Occupational Therapist helps children develop skills for play activities and daily living.

Physiotherapy (PT)
(Birth to 5)

Providing service to children from birth to 5 years through assessment, treatment, and consultation. The Physiotherapist provides parents and caregivers with information about movement such as rolling, crawling, sitting, walking, climbing, and jumping.

Speech & Language (SLP)
(Birth to 5)

Serving children birth to 5 years who may be at risk for speech / language delays with a focus on prevention and identification. Speech and Language Pathologists assess hearing, speech, and language.

Supported Child Development (SCD)
(Birth to 18)

Promoting inclusive child care for children ages birth to 18 years in community childcare settings. The SCD Consultant assists children with special needs to access community childcare settings. The Supported Child Development Assistant provides specialized support in the childcare setting when required.
